

We FINALLY have a law on the books where citizens who do not wish to be disturbed all evening when they are just trying to spend some quality family time have that right and NOW greedy telemarketers want to change this! My wife and I are APPALLED that the law would even consider overturning this. We are now able to sit at the dinner table together as a family WITHOUT being constantly interrupted by intrusive telemarketing calls in which we do NOT want nor have we EVER wanted. We as the public have a right NOT to be bothered and harrassed by companies. It is illegal to call someone and harrass them - why is this any different??? We have the right to have a quiet, peaceful evening without having constant interruptions by companies in which we are NOT interested in hearing from. You MUST stop this from going through and allow the public, if we choose to, to NOT receive these annoying, intrusive calls. Thank you!!
